

HELPING STUDENTS IN NEED TO SUCCEED IN SCHOOL

JOHN KIM , D.C. - BIO

I am a dedicated husband and father of two active boys. My wife was born and raised in Milton and has been a teacher with the Halton Catholic District School Board for over 20 years. Both my boys were also born and raised in Milton and have attended schools in the HCDSB their whole lives. We are active members of the Holy Rosary Parish Community in Milton and have been involved in numerous community activities including extra curriculum sports, music, and educational programs like UCMAS and Spirit of Math.

I was born and raised in Toronto, attended high school at St. Michael's College School then later attended McMaster University and received a Bachelor of Kinesiology. My post graduate studies continued at Palmer College of Chiropractic in Davenport, Iowa, the birthplace of Chiropractic. I received my Doctor of Chiropractic Degree in 2002. In 2004, I returned to Canada, to get married, open a practice, Kim Family Chiropractic, and start a new chapter of my life in Milton, Ontario.

One of my passions is getting involved in school and community activities with my family. We love being active and health and wellness is a major part of our lives, including coaching and training basketball, baseball, hockey, volleyball, soccer and swimming. I have been a part of St. Peter's Parent Council and I am a member of the Holy Rosary Knights of Columbus.

I am also a very active member of the community through various sponsorships or donations like the Milton Centre of the Arts, Milton Chamber of Commerce, the Milton Velodrome, the Milton Street Festival, Milton Salvation Army, Halton Women's Place and many Holy Rosary Knights of Columbus fundraisers.

Finally, for many years, I have also created two scholarship opportunities for graduating students from Bishop Reding High School and St. Francis Xavier High School in Milton. The recipients will receive the Kim Family Chiropractic Scholarship, which is awarded to someone who will be continuing their post-secondary studies in Health Sciences.

Education and futures successes are inherently linked so it is exciting to be able to donate my time and resources in organizations that will "Help Students in Need to Succeed" like the Halton Catholic Children's Education Foundation (HCCEF).
